

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at <http://books.google.com/>

THE
JOHN CRERAR LIBRARY

A LIST OF
CURRENT MEDICAL PERIODICALS
AND ALLIED SERIALS

SECOND EDITION

APRIL, 1913

CHICAGO
PRINTED BY ORDER OF THE BOARD OF DIRECTORS
1913

PREFACE

The present list, the ninth of the Library's bibliographical contributions, is intended to be a guide to the currently received serials which have entry in the printed card catalogue in the Department of Medical Sciences. The current numbers of most of these are kept on open shelves in the Senn Room, arranged alphabetically, and are available without formality. The titles of those not kept in the Senn Room are here printed in *italics*. These, as well as earlier volumes of any serial, may be obtained upon presentation of call slips properly filled out.

For the convenience of those using the list the earliest volume from which a set is current has been given; and in some cases earlier volumes. The existence of serious deficiencies has been indicated by §; this mark may mean that certain volumes are incomplete, that certain volumes between those given are wanting, or both. ¶ indicates that the current numbers of the serial so marked are received by gift, and that the Library consequently does not control the regularity with which they are received.

In cases of recent change of title a cross reference has been made from the old title to the new.

The place has been omitted after Transactions of Societies when the societies meet at different places from year to year.

For more detailed statements and for other data in regard to the serials in this list, reference should be made to the printed card catalogue.

DEPARTMENT OF MEDICAL SCIENCES

THE SENN ROOM, on the sixth floor, (admission to which is without formality) contains:

1. The current numbers of 600 of the medical periodicals received by the Library, arranged on floor cases alphabetically by title.
2. A working library of recent medical works, including the more important reference books, arranged in the wall cases by the Decimal Classification.
3. The rare works of the Senn Collection.

The mezzanine floor contains the remainder of the medical collection, in a parallel arrangement by the Decimal Classification below, and the Newberry Classification above. The relations of the two schemes and the changes made in the order of the second are shown in the table. This floor contains also the largest part of the Senn Collection and the pamphlets. Persons engaged in special research, if satisfactorily vouched for, may be admitted to the stack rooms. Application for this privilege should be made to the Medical Reference Librarian.

The public card catalogues in the Senn Room are as follows:

1. An *author* catalogue covering all works not treated as pamphlets. The call numbers for those arranged by the Decimal Classification are on the right; for those arranged by the Newberry Classification on the left.
2. An *alphabetical subject* catalogue covering the same works, with references to the corresponding places in the Decimal Classification.
3. A *classed subject* catalogue of only those works which are arranged by the Decimal Classification.

In addition, author catalogues of the pamphlets and of the Senn Collection can be consulted upon application to the attendant. There is no subject catalogue of these, but the pamphlets, except a part of those in the Senn Collection, are arranged by subjects, and may be called for by the subject numbers.

TABLE OF CLASSIFICATIONS

D. C.	Subject	N. C.	D. C.	Subject	N. C.
610	General Works.....	Qa-z	616.5	Dermatology	J
611	Anatomy	QA	616.6	Genito-Urinary Diseases	K
612	Physiology	B	617	Surgery	H
